

A MESSAGE FROM YOUR PRINCIPAL

Help us strengthen your child's math skills!

www.firstinmath.com is an easy-to-use, educational web site where your child can improve math skills by playing the popular 24[®] Game online

- Your child's teacher and I would like to provide your child with access to this site because it is a great way for students to learn—and have fun—at school and at home.
- Children proceed at their own pace—mastering problem-solving, computation, critical-thinking and pattern-recognition skills as they advance through the levels of the program.
- Increases achievement and improves attitudes about math.
- Broad range of content—addition to algebra.
- No software to install! Each child will receive his or her own personal User ID and Password to access the site.

Studies show that children who play the 24[®] game on a regular basis experience improvement in math skills. The FIRST IN MATH[®] site harnesses the power of the 24[®] game to get young people excited about math, engaging them like no workbook ever could. Includes fact-practice and test-preparation modules students enjoy.

Your child will be able to access the program here at school and on any computer with internet access 24/7. Your teacher and I hope you will encourage your child to try firstinmath.com at home and enjoy achieving in math. Go online together and discover a great learning experience!

Go to www.firstinmath.com and click the "VISITOR" Link to learn more about First In Math[®]!
